

"I really enjoyed the presentation. It brought a lot to my attention especially the internet and social media section. If I had a chance I would go back for more!" *Allison Tracey*

The PIE workshops were truly an amazing experience. In high school, they don't really go over stuff that you need for the real world, only things like polynomial equations These workshops helped prepare me for interviews for jobs, sports, and school, and helped me know what to expect. *Hassana O'Connor*

Well I thought that her session was pretty informative and practical. It's some real knowledge about areas as young adults and youth looking to enter into the workforce need to understand. Not everyone takes the time to break down the do's and don'ts and the perception that's can be associated though just your appearance. Perception is often times the first thing people examine before even hearing someone speak. It's powerful." *Nigel Johnson*
